Key points of environmental safety and health management for contractors of National Taiwan Normal University

Approved by the Environmental Protection and Safety and Health Committee on December 25, 107

1. National Taiwan Normal University (hereinafter referred to as the school) strengthens the safety and health management of contractors and urges them

The protective measures to be taken are formulated in accordance with the "Occupational Safety and Health Law" and relevant regulations on environmental protection.

The school's "Key Points of Environmental Safety and Health Management for Contractors" (hereinafter referred to as the Key Points).

2. The scope of application of this key point includes all contractors who enter the school to work.

3. When the contractor undertakes various business of the school, it shall be responsible for the contracted part as stipulated in the "Occupational Safety and Health Law"

The employer's liability is the same when the contract is re-contracted.

4. When the requisitioning unit of the school delivers various businesses to the contract, it should inform the contractor about its affairs in advance

Work environment, hazards and occupational safety and health laws and relevant safety and health regulations should be adopted

measure. When the contractor delivers all or part of its contract to subcontract, the contractor shall also follow the previous

Item stipulation to inform the subcontractor.

5. Contractors should sign the school's "Contractor's Environmental Safety and Health Commitment" (Attachment)

1) and the "Notification of Environmental Hazards for Contracted Operations" (Appendix 2).

6. The contractor shall, according to the nature of the construction, handle the overhead, fire, excavation, hanging,

Application for confined space or other special hazardous work order"), and must proceed after completion.

7. When the requisitioning unit of the school, the contractor and the re-contractor separately hire laborers to work together, in order to prevent employment

In case of industrial disaster, the purchaser of this school shall set up an agreement organization and take the following necessary

measures to implement the record

(Refer to Annex 4 "Minutes of the School's Contractor Joint Operation Agreement Organization Meeting"), which should be kept for three years.

(1) Designate a person in charge of the workplace to take charge of command, supervision and coordination.

(2) Connection and adjustment of work.

(3) Inspection of the workplace.

(4) Guidance and assistance in safety and health education among related contracting enterprises.

(5) Other matters necessary to prevent occupational disasters.

8. When the requisitioning unit of the school handed over two or more contractors to work together without participating in the joint work, they should

Designate one of the contractors to handle the seventh point.

9. During the contract period, the contractor shall strictly abide by the "Air Pollution Control Law", "Water Pollution Control Law" and Environmental laws and regulations such as the Waste Disposal Act.

10. If this key point is not specified, other laws and regulations promulgated by the government and relevant regulations of the school shall apply.

11. These points will be announced and implemented after being deliberated and approved by the Environmental Protection and Safety and Health Committee, and the same will be true for revisions.
